

Dalet 5.1 採用開放式的架構，能夠輕易地與電台網站結合，創造電台收益

The image displays the Dalet 5.1 software interface, which is designed for radio stations. It features a central control panel with two digital displays showing time and song information, along with various playback controls like play, pause, and stop. Below the controls, there is a list of songs being played, including '百分百' by 郭靜 and '再見小時候' by 南拳媽媽. The interface also shows a web browser window displaying a website with the title '我們最近播出的音樂' (Music we recently broadcasted), which lists various songs and their broadcast times. A large yellow arrow points from the text '開放式架構，網站結合，倉' (Open architecture, website integration, warehouse) towards the software interface, highlighting its integration capabilities. In the bottom right corner, there is a small inset window showing a music player interface with the song '下一個天亮' by 郭靜.

開放式架構，
網站結合，倉
